Lyme Computer Systems, Inc. Receives Cisco Federal Authorization

Lyme, NH based Lyme Computer Systems, Inc., a national technology solution provider, has announced it received US Federal Authorization from Cisco Systems, Inc.

The US Federal Authorization program from Cisco Systems, Inc. is a new program which distinguishes Cisco partners who have a dedicated federal Cisco practice and knowledge of the following federal business practices:

- Federal Acquisitions Requirement (FAR)
- Procurement Integrity Act
- Federal Information Processing Standards (FIPS)
- Federal Information Security Management Act of 2002 (FISMA)
- Defense Priority Allocation System
- Common Criteria – SFRs and SARs

“Lyme Computer Systems, Inc. is very excited to become one of a select group of Federal Authorized Cisco Premier partners.” said Josh Longacre, Vice President of Sales and Operations of Lyme Computer Systems. “Agencies are now able to distinguish trusted Cisco partners that are well-versed in the intricacies of selling to the federal government. In addition, agencies can avoid purchasing counterfeit or gray market products when working with a US Federal Authorized Cisco partner.”

About Lyme Computer Systems, Inc.

Lyme Computer Systems, Inc. is a 100%, employee-owned information technology solution provider dedicated to servicing the government, commercial, education and healthcare markets since 1984. We partner with leading technology manufacturers to provide optimal, cost effective solutions for information technology requirements.
