## **Lyme Computer Systems, Inc. Announces SBA HUBZone Certification**

Lyme, NH based Lyme Computer Systems, Inc., a national technology solution provider, has announced that the US Small Business Administration certified the company as a HUBZone firm.

The Historically Underutilized Business Zone (HUBZone) Program stimulates economic development and creates jobs by providing federal contracting preferences to small, HUBZone certified businesses.

“Lyme Computer Systems, is very excited to be recognized for achieving the HUBZone certification,” said Josh Longacre, Vice President of Sales and Operations of Lyme Computer Systems. “The certification process is a rigorous review process by the SBA to ensure we’re compliant with all of the program requirements. As a New Hampshire company pursuing federal IT contracts, this certification will allow Lyme to compete on HUBZone set-aside opportunities, while supporting economic growth within our rural region.”

The federal government has a goal of awarding 3% of all dollars for federal prime contracts to HUBZone certified small businesses.

### **About Lyme Computer Systems, Inc.**

Lyme Computer Systems, Inc. is a 100%, employee-owned information technology solution provider dedicated to servicing the government, commercial, education and healthcare markets since 1983.
