Lyme Computer Systems, Inc. Awarded \$20 Billion NASA SEWP V Contract

Lyme, NH based Lyme Computer Systems, Inc., a national technology solution provider, has announced it was awarded a Solutions for Enterprise-Wide Procurement (SEWP) V contract by NASA.

SEWP V contracts are commercial firm-fixed-price, indefinite delivery, indefinite quantity (ID/IQ) delivery order contracts with an ordering ceiling of \$20 billion. They have an effective ordering period of 10 years, with a 5-year base period and one 5-year option. The principal purpose of the SEWP V contracts is to provide state-of-the-art information technology and computer technologies, high-end scientific and engineering processing capabilities, network equipment and peripherals. As government-wide acquisition contracts (GWACs) they can accept orders from all NASA centers, all federal agencies, and their contractors.

“Lyme Computer Systems, Inc. is very excited to be awarded the fifth iteration of the NASA SEWP contract,” said Josh Longacre, Vice President of Sales and Operations of Lyme Computer Systems. “SEWP V will be the premier contract vehicle for federal agencies to procure their information technology requirements in a compliant and cost-effective manner. Winning the SEWP V award would not have been possible without the exceptional performance of each of our employees. They are our most valuable asset and we look forward to bringing the knowledge and experience gained from supporting the federal government for over 30 years to the SEWP V contract.”

About Lyme Computer Systems, Inc.

Lyme Computer Systems, Inc. is a 100%, employee-owned information technology solution provider dedicated to servicing the government, commercial, education and healthcare markets since 1984. We partner with leading technology manufacturers to provide optimal, cost effective solutions for information technology requirements. Our goal is to help clients derive real business value from their information technology investments.
