## **Lyme Computer Systems, Inc. Becomes Webroot Authorized Partner**

Lyme, NH based Lyme Computer Systems, Inc., a national technology solution provider, has announced it has become an authorized Webroot partner.

Webroot is the market leader in cloud-based, real-time internet threat detection for consumers, businesses and enterprises. They have revolutionized internet security to protect all the ways people connect online. Webroot delivers real-time advanced internet threat protection to customers through its BrightCloud® security intelligence platform, and its SecureAnywhere™ suite of security products for endpoints, mobile devices and corporate networks. Over 7 million consumers, 1.5 million business users and 1.3 million mobile users are protected by Webroot. Market-leading security companies, including Palo Alto Networks, F5, Cisco, RSA, NetCitadel, GateProtect, Microsoft and others choose Webroot to provide advanced Internet threat protection for their products and services. Webroot is the largest privately held internet security company in the United States – operating globally across North America, Europe and the Asia Pacific region.

“Lyme Computer Systems, Inc. is pleased to be partnered with Webroot. They offer an award winning security solution that uses very little client resources. We believe this will resonate with our enterprise customers. We look forward to helping Webroot grow their business user base.” said Josh Longacre, Vice President of Sales and Operations of Lyme Computer Systems.

### **About Lyme Computer Systems, Inc.**

Lyme Computer Systems, Inc. is a 100%, employee-owned information technology solution provider dedicated to servicing the government, commercial, education and healthcare markets since 1984. We partner with leading technology manufacturers to provide optimal, cost effective solutions for information technology requirements. Our goal is to help clients derive real business value from their information technology investments.
